

Window awning with ZIP guidance

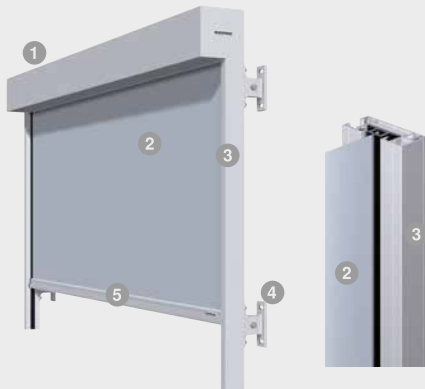

Information at a glance

Der SonnenLichtManager

Window awnings with ZIP guidance

- 1 Cover panel
- 2 Fabric
- 3 Lateral guidance
- 4 Guide rail bracket
- 5 Drop profile

► The benefits for you

- High wind stability up to a maximum wind speed of 24 m/s through side hem guide over the entire height of the awning
- No incidence of light between guide rail and fabric
- The electronic special drive (responsive obstacle detection) reacts sensitively to obstacles and wind, guaranteeing maximum fabric protection
- Viewing field made from PVC film
- Window awning with ZIP guidance corner solution for all-glass corners without disruptive guide rail
- Cover panel and guide rails can be partially embedded in plaster
- Versatile use in commercial and residential buildings on vertical facades or punched windows
